FOR IMMEDIATE RELEASE:

EIU PROFESSOR PLANS INTERNATIONAL WORKING TOUR

CHARLESTON -- Dr. S.K. Dey, professor of mathematics at Eastern Illinois University, has been invited by the University of Alicante, Spain, and the S.N. Bose Centre for Basic Sciences at Calcutta, India, to be a visiting scientist during the months of June and July.

While in Spain, Dey will also preside over IMACS (International Association for Mathematics and Computer in Simulation) '98, an international conference on scientific computing and modeling. Approximately 200 scientists from Europe, the United States, Japan, China, Canada and India will attend the June 25-27 event.

In addition, Robert Vichnevetsky, faculty member in the Department of Computer Science at Rutgers University and chair of IMACS, selected Dey to preside over the conference and edit a special issue of the association's international journal. "Mathematics

INTERNATIONAL TOUR

and Computer in Simulation" will contain a few selected articles from the conference.

Dey's personal topics of research -- hemodynamics for the prevention and cure of breast cancer and parallel computations for high speed flows -- earlier caught the attention of the Division of Computational Fluid Dynamics of NASA-Ames Research Centre in Moffett Field, Calif. In March of this year, he was invited to California to lecture on these two topics.

The EIU professor, who will leave for Europe on May 26, will present a two-day series of lectures at the University of Chester in the city of Chester, located about 150 miles northwest of London, before heading on to Alicante.
